ASMAA ALHAMADA

FRONT END DEVELOPER

Damascus +963, Syria | asmaalhamada4@gmail.com | 0991401566 | LinkedIn | profile | GitHub

Summary

Front_End Developer ,Personal_Projects Feb 2022 to Current
Damscus
Software Engineering student with 2+ years of experience building modern, high-performance web applications. Led development of a complex platform with 16 role-based permissions, delivering under tight deadlines in a collaborative team. Improved application performance by 30% through efficient state management using Redux Toolkit.

Projects

Ammrha Landing-Page

May2026 to May3, 2026

- Convert UI & UX to real pages
- Modern, responsive UI optimized for performance and Animetion
- Developed a Server (https://asmaaahamada.github.io/Ammrha-Landing-page/#/)

The Syrian Board

Jul 2025 to Sep 10, 2025

- Comprehensive digital transformation from paper-based workflows to a fully integrated system
- Built advanced RBAC system with 17 hierarchical roles and fine-grained permission control
- Developed dynamic workflow engine for transactions, exams, and approvals with configurable rules
- Implemented real-time dashboards, internal communication system, and financial verification with high performance UI
- Modern, responsive dashboard UI optimized for performance and scalability

Salati

Nov 2025 (4 weeks)

- Built a location-aware Islamic app with accurate prayer times, Qibla direction, and customizable calculation methods
- Implemented secure authentication (email/password & Google) with personalized user experience

- Developed rich spiritual features including Athkar library, audio duas, Tasbeeh counter, and progress tracking
- Integrated real-time notifications, Adhan audio, and high-performance responsive UI with dark/light themes

Complaints Management System
Late Nov 2023 – Mid Dec 2023

- Advanced role-based access control (Admin / Employee) with secure permission management.
- Full management of government entities and employee accounts (create, update, delete).
- End-to-end complaint system with centralized dashboard, assignment, real-time status tracking, and live updates.
- Powerful analytics and reporting with advanced search/filtering and in-app notifications for workflow updates.

GlowPink Delivery App
Sep 2024

- Dual-role system (User/Admin) with full delivery and order management capabilities across the platform.
- Real-time tracking and order lifecycle management, including location tracking and delivery workflow from confirmation to completion.
- Secure payment integration with Stripe, plus push notifications for live order and delivery updates.
- Powerful admin dashboard with analytics, product/user management, and a modern responsive UI with light/dark themes.

Aleppo Weather App
Early Aug 2024

- Real-time weather app for Aleppo displaying current, minimum, and maximum temperatures with live API integration.
- Multilingual support (English/Arabic) with instant switching and fully localized date/time formatting.
- Enhanced user experience with localized time display and dynamic weather descriptions for accurate updates.
- Clean, responsive Material UI design with intuitive weather icons for clear visual representation.

EDUCATION

University of Damascus, Faculty of informatics Engineering
Jan 2021 to Aug 2026
Degree in Software Engineering ,Damascus
Software Engineering student with hands-on experience in front-end development and acadimc projects interested in building responsive and user–centered web App with strong team-work

AREAS OF EXPERTISE

- Frontend Development
- Web Application
- Responsive Web Design
- API Integration
- Performance Optimization
- Server-Side Rendering

TECHNICAL PROFICIENCIES

- **Languge & FrameWork:** React-js ,Next-js , Html ,Js ,Css ,Js(Es6)
- **State & Mangament :** Redux, React Query, Conten API ,Redux Tolklt
- **Tools & Version Control:** Git, GitHut, Axjos, Formik
- **Styling & UI:** Tellwend CSS , Bootstrap ,CSS Modules, Responsive Design ,Luatti
- **Other Skills:** RESTfu1APls, Deployment (Vercel, N'etlitý, GitHub Pages) Debugging, Problem Solving
